PROFESSIONAL SUMMARY

Computer Science Engineering student focused on full-stack development and software engineering, with hands-on experience developing, testing, and deploying web applications. Strong foundation in Data Structures and Algorithms (DSA), object-oriented programming, and core computer science concepts. Familiar with SDLC, Agile development, debugging, API integration, database design, and collaborative problem-solving.

EDUCATION

B.Tech in Computer Science Engineering | Amity University Madhya Pradesh — CGPA: 7.88 | Final Year
Senior Secondary (12th), CBSE | Swami Vivekanand Academy, Gwalior — 69.8%
Secondary (10th), CBSE | Swami Vivekanand Academy, Gwalior — 70.8%

PROFESSIONAL EXPERIENCE

Application Development Intern — *Aug 4, 2026 – Sep 4, 2026*
Pega National Internship Program — *Remote*
- Gained hands-on experience with the Pega environment through guidance from Pega program mentors and senior professionals, learning low-code development practices.
- Configured case stages, approval steps, and work queues in Pega to support structured business workflows.
- Developed a movie-ticket management application in Pega App Studio and Pega Blueprint, covering show availability, seat allocation, pricing, and booking execution.

Web Development Intern — *Aug 21, 2025 – Sep 30, 2025*
Edunet Foundation – AICTE Collaboration — *Remote*
- Developed and debugged responsive web pages with HTML, CSS, and JavaScript, applying core UI and usability principles.
- Completed assigned development tasks in a structured 6-week remote program, improving interface behavior and consistency.
- Created a personal portfolio website to present projects, technical skills, and development experience.

PROJECTS

FINMATE AI — *Dec 2025 – Present*
Tech Stack: Python, Flask, React.js, PostgreSQL, Supabase, Firebase Authentication, RAG
- Built an AI-powered financial platform that converts financial data and documents into structured insights to support day-to-day financial decisions.
- Integrated retrieval-augmented generation (RAG) and document processing to analyze financial information in context and deliver personalized AI guidance.
- Stored application data in Supabase/PostgreSQL, enabled secure sign-in with Firebase Authentication, and deployed the frontend and backend on Vercel and Render.

ARENA – Sports Quiz Platform — *Sep 2025 – Present*
Tech Stack: JavaScript, Next.js, React, Supabase, PostgreSQL, WebSockets, AI APIs
- Developed quiz experiences across 8 sports, with solo, challenge, admin, and real-time multiplayer modes.
- Supported concurrent gameplay with 10 active quiz rooms of up to 20 players each, while other users could use additional modes without noticeable lag or queueing.
- Added AI-generated questions and real-time voice/chat features, validated core logic with 45 automated assertions, and deployed on Netlify and Render.

TECHNICAL SKILLS

Languages: Python, C, C++, SQL
Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, SDLC, Agile Methodologies
Web Development: HTML, CSS, JavaScript, JSON, React.js, Next.js, Node.js, Flask, Django, REST APIs
Databases and Authentication: PostgreSQL, MongoDB, Supabase, Firebase Authentication
Tools and Deployment: VS Code, Git, GitHub, Docker, Postman, CI/CD, Vercel, Render, Netlify
Real-Time Technologies: WebSockets, WebRTC, Web Audio API
Low-Code Development: Pega App Studio, Pega Blueprint, Pega Platform

CERTIFICATIONS & ACHIEVEMENTS

Certifications:
- IBM Web Development – IBM SkillsBuild (2025).
- Google Generative AI – Simplilearn (2025).
- Tata Cybersecurity Fundamentals – Forage (2025).
- VOIS Data Analytics – VOIS (2026).

Achievements:
- Won Amity Zync Hackathon 2026 with FINMATE AI; competed in four hackathons overall.
- Demonstrated communication, teamwork, and collaborative problem-solving through project work.
