CAREER OBJECTIVE

Motivated final-year B.Tech Computer Science student with a strong foundation in software architecture, full-stack development, and AI/ML-driven solutions. Adept at writing clean, reusable code, integrating APIs, and quickly adapting to new frameworks. Seeking a Trainee Software Engineer role to design and deliver scalable, end-to-end features using core programming skills in Java and Python.

ACADEMIC DETAILS

- BTech- CGPA 7.79 | Minor in Cyber Security
- Senior Secondary (12th), CBSE – 69.8%
- Secondary (10th), CBSE – 70.8%

EXPERIENCE

Web Development Internship | Edunet Foundation – AICTE Collaboration
Aug 21, 2025 – Sep 30, 2025 (6 weeks, Virtual)

- Built and debugged responsive, user-friendly web interfaces using HTML, CSS, and JavaScript
- Strengthened UI/UX understanding and applied modern front-end web development practices
- Collaborated with virtual team members and consistently delivered tasks within set timelines

Palo Alto Networks Cybersecurity Virtual Internship | EduSkills Collaboration
Oct 2025 – Dec 2025 (3 months, Virtual)

- Completed structured cybersecurity training covering network security, threat detection, and security operations fundamentals under the Palo Alto Networks curriculum
- Gained hands-on exposure to firewall configurations, threat prevention techniques, and security frameworks through guided virtual labs
- Strengthened understanding of enterprise cybersecurity practices and industry-standard security tools

PROJECTS

FINMATE AI
Tech Stack: Python, Flask, MySQL, LLM, RAG, React.js

- Built an AI-powered financial intelligence platform that analyses financial data and generates structured, actionable insights for informed decision-making.
- Implemented Retrieval-Augmented Generation (RAG) pipelines and intelligent document processing to extract and contextualise information from unstructured financial documents.
- Engineered efficient backend data workflows in Python & Flask to transform raw outputs into decision-support systems. and a powerful AI Advisor that can tackle any money related issue
- Applied statistical analysis and AI-driven techniques to deliver personalised financial recommendations, improving information accessibility and decision quality.

CANARY-WORKSPACE AI FILE
Tech Stack: Python, Flask, SQLite, Fernet Encryption, Telegram and multichannel API

- Built a lightweight file-monitoring and managing tool to manage and detect unauthorized file access in real time.
- Implemented webcam snapshot capture, IP chat for managing files and multi-channel API integrations that use access events.
- Designed a dark-themed monitoring dashboard for real-time visibility into access events and system activity.
- Secured sensitive logs and captured evidence using Fernet encryption to protect against tampering.

TECHNICAL SKILLS

- **Web Development and Backend:** React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design, DOM Manipulation, REST APIs, Node.js, NPM.
- **Frameworks & Technologies:** Next.js (App Router), Node.js, Express.js, Flask, Tailwind CSS
- **Programming & Core Skills:** Python, SQL, Java, C++, Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Architecture.
- **AI & Machine Learning:** LLM Applications, Prompt Engineering, RAG Systems, AI APIs, Machine Learning
- **Databases:** MySQL, Relational Database Design, Database Query Optimization, JSON-based Storage
- **Cybersecurity Tools:** Digital Forensics Tools, Cyber Law Frameworks, Threat Analysis Tools
- **Integrations:** Razorpay (Payments), PDF Generation, Messaging APIs, Third-Party API Integration
- **Data & Analytics:** Microsoft Excel

- **Operating Systems:** Windows, Unix/Linux
- **Developer & Analytics Tools:** Git, GitHub, VS Code, OpenCV, Claude, Cursor, Excel, Firebase, Supabase, Kiro, Antigravity

AWARDS AND ACHIEVEMENTS

- Tata Cybersecurity Analyst Certification
- Google Generative AI Certification
- Oracle Networking Professional Certification
- IBM Web Development Certification
- Palo Alto Cybersecurity Certification
- 3x Hackathon Participation Experience (Including 1x Winner)

LEADERSHIP & INITIATIVE

- **End-to-End Application Delivery:** Independently conceptualized, engineered, and deployed scalable AI and web software projects from scratch.
- Collaborated with peers during hackathons and academic projects to build and ship full-stack solutions under tight timelines.
- Demonstrated ownership by identifying real-world problems and building responsive, user-focused web solutions to address them.
